Time ago. When the time didn't exist, there was nothing except a single thing smaller than anything you can except to be.

Vak. "Sounds weird. Guess what it is. Nah, you can't simply guess anything." Did you just read the entire previous sentence in your mind? Hehe boi.... do you ever feel that you can hear the sound in your mind? Do you hear the voice of yours speaking or reading out something in your mind? Yes, you do feel the sound. Ever wondered what is it ? Yes, you guessed it, it is called Vak.

So, vak is the inner sound which doesn't really seem to be existing but it does.

Augh.... still confusing, right?
Let us start before the start.

[ ] Chapter 1

First of all, you have to understand what is the difference between Brahmā and Brāhmānda. Brahmā, is the god whom we all pray. You know them, Brahmā, Vishnu and Mahesh. But Brāhmānda means the ultimate reality. A very shapeless thingy. Where it came from? How it came? No body knows.

When there were no Brahmā, no Vishnu, no Shiva; one thing still existed, Brāhmānda; ultimate reality. There was another thing existing with Brāhmānda which is called Vak, means sound. We all know, Omm is an eternal mantra about which no body knows. How is its origin? When is it

origin since?.... nobody knows.

So with the Brāhmānda, there was Omm; sound; vak. Then from both Brāhmānda and Omm/Vak, they came to an origin; Brahma, Vishnu, Maheshwara.

The thing we call an atom, is itself a mystery. Neither could anybody ever prove what really are protons, neutrons and electrons nor for where where did came from. All that we know is, there was Brāhmānda with it there was Vak from which there was the origin of Trimurti(Brāhma, Vishnu and Mahesh) . Now, in science, to make an atom come into motion, to bring it into some action, we need to give it some external energy. So, now, that energy should be given by Trimurti. So, from the ultimate reality which we are talking about. From there, the Trimurti is getting the energy and we generally call that energy as Shakti. And so we see each goddess with each god, we call this triple couple as Trimurti Shakti.

Now, consider Brāhma, Vishnu and Mahesh as one united. Just like there are electrons, protons and neutron which we generally call an atom but kind of never use their own names.

After the consideration, the combination of these 3; Brāhma, Vishnu and Mahesh is called Prajapati.

Now, you know, in Prajapati, there is sound from ultimate reality and are Trimurti Shakti. Thus, a Prajapati(Trimurti + Shakti + Vak), has both Vak and Omm, it can think inside itself that how will they start creating, how will everything work, how creatures will be.

As he (Prajapati) starts thinking about the creation, the creation starts in the literal reality. Might sound illogical that how the universe can be formed only by thinking of it. Too much illogical, how just by thinking the Earth came into existence, how the the planets came into existence.

[ ] Chapter 2

In Vedas, about the creation of everything, the first mantra said is, “So’srãmyat sa tapo’tapyata.” This means: Prajapati thought with his powers, “I shall divide myself into several parts and think of the universe.”

Then, the second mantra, “Vãg evā sya sā sr . Jyata” This tells: Vak, that is sound. We all know what is sound. But sound is not only the thing which we speak. Rather, the things we are thinking about is also sound. You all would have noticed that when we think of anything, then feel that we hear the thought inside our mind. So, the process of thinking in our brain is also a Vak; it is sound. So, in Vedas, it is said that Prajapati all together with his Shakti made a sound(vak) inside him; he started thinking that how will the universe will form, how it will form. Then when he thought all these things in himself.....

In vedas we later read, “Garbhī abhavat” . Combining the details we understand that after the thoughts of Prajapati, Shakti for pregnant. Here, pregnant doesn’t mean that a kid will come from inside. In vedas, we get everything in encrypted form. So, here the term pregnancy means when Prajapati thought of how the universe will be formed with the help of vak, a desire evolved, an imagination evolved - - that’s called pregnancy here. At last it is said:

“Saa asmaad apaakraamat, saa imaah prajaah aadhata” meaning the desire came out and made out everything real and whatever we see today is what came out of prajapati.

Chapter 3 []

When you understand by analysis properly, you’ll come to know that before the universe came into literal ultimate reality, the universe has already been formed inside prajapati. How exactly? - - in form of vak ofcourse; as sound.

When you try to say something, you first always say it inside of yourself. Whatever you want to say always reach up the brain first as signals then mind creates it then you finally say it. - - just like that understand the concept that Prajapati gave signals to mind about how he wants the universe to be.

So, at first the universe wasn't created literally-externally. It formed inside of Prajapati first.

The vak, that Prajapati thought of, that's nothing else but our vedaa. Vedaa was not a book. Vedaa was the knowledge by which the universe was formed.

READ ONLY IF YOU KNOW A LOT:

Then very later saint vyas compiled the vak of Prajapati into knowledge and put them into 4 different parts.

That's why we find everything, every answer, every knowledge to know in the vedaa. You know it now. That vedaa was first formed inside of Prajapati and then with that vedaa the entire universe.

(yup, the vedaa was formed before the universe)

----x----

PROVED.

DIDN'T I?

Now if you are a vedaa singer and understander then you might now totally understand this fact. That how universe was truly formed.
